

// SUBPROCESSOR LIST · v1

# Vendric Labs

## Subprocessors

*Three vendors. Each one named, each one scoped.*

Document	Subprocessor List · v1
Last revised	2026-05-27
Notification policy	New subprocessors will appear on the public list before they begin processing customer data.

### 1 · MICROSOFT AZURE

Role	Reeve product hosting and storage
Data accessed	All Reeve customer data: incident records, attached photos, audit-chain artifacts, per-tenant verification keys, citation index, derived analytics.
Region	United States Azure regions
Contractual basis	Microsoft Online Services Data Protection Addendum (DPA), Standard Contractual Clauses where applicable.
Encryption posture	Storage Service Encryption with AES-256-GCM; backups encrypted with same posture.

### 2 · ANTHROPIC

Role	AI inference for Reeve (vision + reasoning via Claude Sonnet)
Data accessed	Construction-site photos and OSHA-rule text the customer submits, plus prompts assembled by the Reeve backend.
Region	Anthropic-managed inference, US

---

<b>Contractual basis</b>	Anthropic Commercial Terms of Service. We have not opted into the training-data program for this workload. Customer submissions to Reeve are never sent to any training pipeline.
--------------------------	---

### 3 · NETLIFY

<b>Role</b>	Marketing site hosting (vendriclabs.net) and inbound email capture
-------------	--

<b>Data accessed</b>	Email addresses (and passwords, if self-login is enabled in the future) captured via marketing forms. No Reeve customer record data.
----------------------	--

<b>Region</b>	United States, Netlify Edge
---------------	-----------------------------

<b>Contractual basis</b>	Netlify Master Services Agreement and Netlify DPA.
--------------------------	--

<b>Encryption posture</b>	TLS 1.3 in transit; Netlify storage-level encryption at rest.
---------------------------	---

### EXCLUSIONS

We do not use analytics trackers that record customer data. We do not use a customer-data platform. We do not use third-party fonts that phone home. We do not use third-party widgets (chat, surveys, feedback) on the marketing site. If we ever add one, it will appear on this list before it ships.
